

# COVID-19: ESSENTIAL BUSINESS SOLUTIONS

## GROCERY + PHARMACY

During this health pandemic, how can you protect your staff and customers while continuing to operate efficiently? We have solutions that can help.

We have extensive inventory of flexible panels that can be configured—and reconfigured—to suit your business operations. Safe and effective register barriers, complete with fabric or acrylic, are just one option to safeguard employees and guests. These panels don't damage your existing structures and are quick and easy to set-up.

Vinyl floor and signage are also valuable assets to manage traffic flow and enforce the safe distancing necessary to keep people apart.

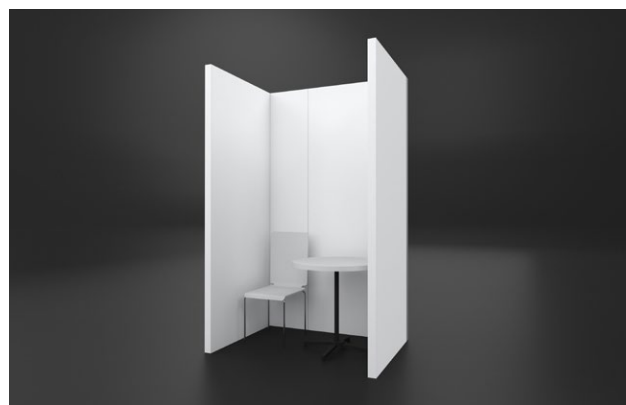

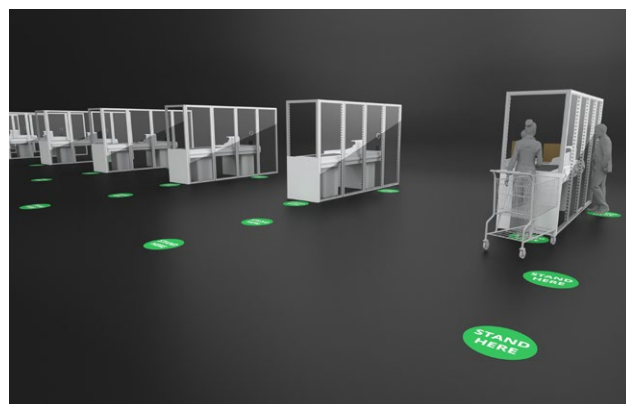

The solutions can be tailored to specific needs and extended to employee breakroom areas as well as offices to safeguard your entire facility.

We are ready to get you the solutions you need to stay safe and operational during this challenging time.
